

Theft Deterrent or Sleek Marketing Display?

This unit is both.

CrystalVue™

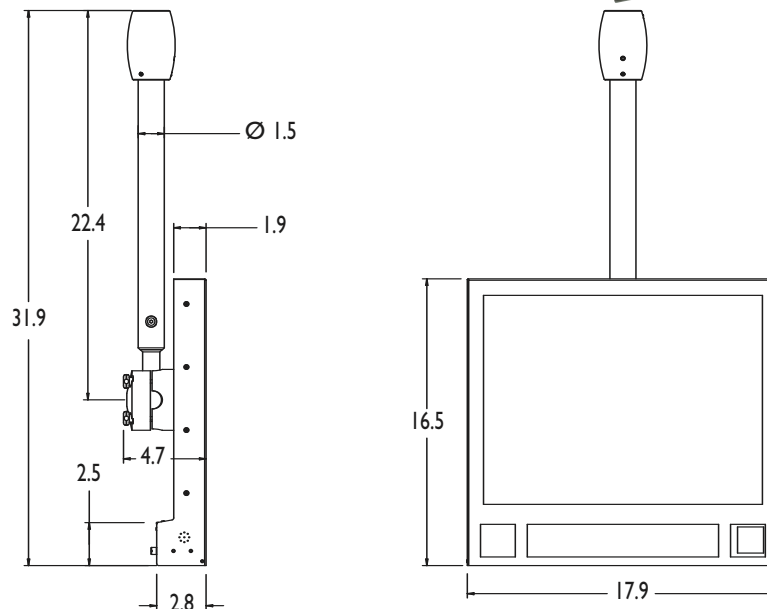

Public View Display System

The Aigis Public View Display System builds a high quality CCTV camera into an Ultra Bright LCD screen to produce a sleek, modern offering. The built-in advanced electronics turn this system into a marketing tool that can run advertisements while it continues to capture video surveillance. Upon alarm, motion, or change in light level, CCTV video can be instantly displayed to notify the viewer that surveillance is employed throughout the facility. Because the unit was designed and built by Aigis, the electronics can be factory customized to meet a customer's exact requirements.

- Ultra Bright LCD Screen with built in Camera
- Programmable Light Sensor
- Programmable Motion Detector
- Optional Wide-Dynamic Camera
- Run Advertisements while Monitoring Store
- Quick Install Mounting Mechanism
- On-Board Memory Option

PVD - DIMENSIONAL DRAWING
