

LTC 9385 Series Housings Outdoor

- ▶ For 1/3-inch, 1/2-inch, or 2/3-inch format CCD cameras
- ▶ All aluminum construction
- ▶ Easy installation
- ▶ Removable cover
- ▶ Built-in window heater/defogger
- ▶ Accessories available

The LTC 9385 Series of medium-sized environmental housings are attractive aluminum enclosures designed for outdoor CCD camera installations. These housings are constructed of an extruded aluminum cover and a fabricated aluminum frame. The unique design allows adjustments to be made to the camera in its mounted position, once the cover is removed. The cover contains a polycarbonate window that is UV stabilized. An internally mounted thermostatically controlled heater is standard. The heater design minimizes fogging of the window in high humidity areas, or freezing under cold temperature conditions. The rear of the housing contains three liquid-tight fittings which permit pass-through of video coax, AC power, and lens control wiring. The housing is sealed with O-rings. The mounting base assembly permits mounting to pan/tilts, adjustable heads, and various wall-mounts. A unique feature of this housing is an internal rail assembly that rotates independently of the mounting base assembly, and allows the camera to be mounted at any angle.
