

# NetEye™ Gold

**STILL IMAGES, VIDEO STREAM & 2 WAY AUDIO  
STAND - ALONE DIGITAL TRANSMITTER**

*Visual Monitoring with a mind*

*Supports  
Alarm Central  
Monitoring Stations*

## **A Winning Combination**

The most innovative transmitter on the market today. Reasonably priced functionality and feature rich. NetEye Gold transmits quality video streams, color images and full duplex audio from remote CCTV cameras to a monitor station or a PC. Leading the way in video monitoring software solutions and equipment, the NetEye Gold transmitter comes included with the Observer - a most comprehensive remote monitoring software application. The economical, easy to install and versatile NetEye Gold system is the winning choice of installers, monitoring stations and proprietors alike!

The NetEye Gold's powerful processor digitizes analog video and audio signals in real-time and transmits them over telephone lines, ISDN, and cellular communications for monitoring and recording at the monitoring station. All this is done from a small box with no need for a PC at the monitored premises.

EXTENDING THE POWER OF YOUR SENSES

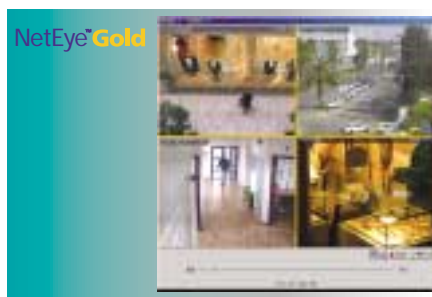

# NetEye™ Gold

STILL IMAGES, VIDEO STREAM & 2 WAY AUDIO  
STAND-ALONE DIGITAL TRANSMITTER

Professional, stand alone surveillance system, transmits quality color images, Video streams and audio from remote CCTV cameras to your PC, control, & monitoring station

The **NetEye™ Gold** can be fully controlled by an **Alarm Central Monitoring Station** or a **proprietary control station**, to give you the following features, and more:

- Remote Video and Audio Surveillance.
- Visual Alarm Verification.
- Virtual Video Tour.
- Remote Video Gate control.
- Video Guard Patrol.
- NetEye Gold supports 8 color /BW cameras, 8 audio channels, 8 alarm triggers and 8 relay outputs.
- Transmits on alarm or on demand.
- Automatic pre and post event recording at the premises.
- NetEye Gold is software based and is fully programmable and fully upgradeable.
- Produces high quality images at high transmission rate.

The best benefit, however, is the potential savings to your clients.

NetEye Gold replaces security personnel and cuts down company costs.

The transmitter and the software give your clients an improved response to verified alarms, and enhanced police confidence in the validity of the alarms.

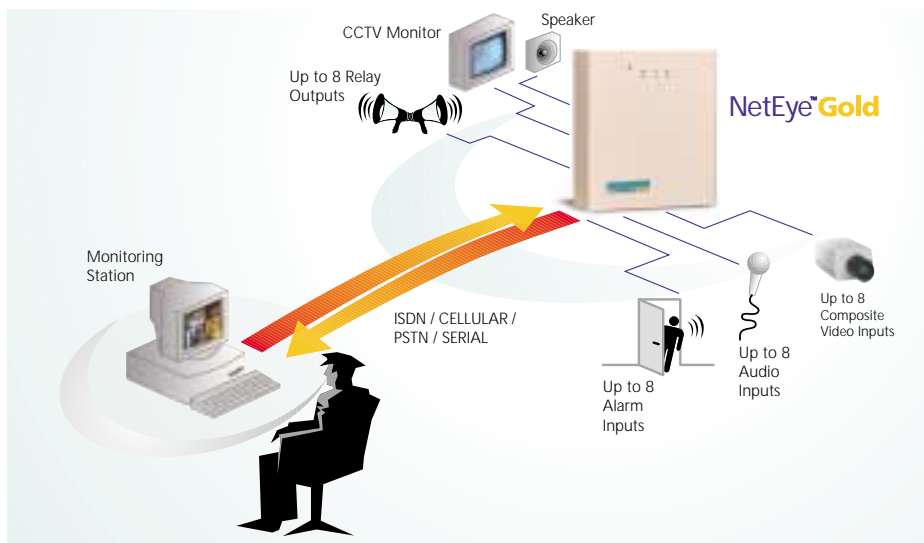

The NetEye Gold system minimizes false alarms and saves your customers the costs of false alarm fines. Operators at the monitoring and control station need very little training to adapt to the Observer, and the software and transmitter integrate very easily and smoothly into existing CCTV systems, so there is no need to discard existing equipment.

NetEye Gold. Anyway you look at it, everyone's a winner. Except the criminals, that is.

## TECHNICAL SPECIFICATIONS

Video Inputs	8 BNC
Audio inputs	8 RCA
Alarm inputs	8 Terminal block
Relay Output (SW controlled )	8 Dry contacts
Video outputs	2 BNC
Audio output	1 RCA (2 connectors)
Serial communication	2 DB-9 RS -232/485
Internal modem	PCMCIA slot Optional
Voltage	110/220 VAC
Still compression	JPEG
Video stream compression	H-263
Frame rate	QCIF up to 15 fps CIF up to 10 fps
Video Input impedance (Selectable)	75 Ohm or High- Z
Video standards	EIA/ CCIR, NTSC/ PAL
Dimensions w/d/h	380/280/10mm
Weight	3.5Kg
